Oracle Error Messages

The following are error messages you may receive while administering the Oracle database, along with suggestions for resolution. The development identifier portion of the code is signified by an asterisk (*). To resolve any errors not listed here, please see *Oracle7 Server Messages*.

Error Code	Error String	Resolution
WGB-*-1010	Cannot allocate memory.	Contact Oracle Worldwide Support. In the USA, call 1.415.506.1500. In Europe, call +44.1344.860160.
WGB-*-1011	Cannot access file or path.	The destination path specified for the backup either does not exist or does not have the correct permissions. Check if the path exists and whether it has read-write permissions.
WGB-*-1031	Unknown database status.	The Backup Manager cannot determine the state of the database at this moment. Please use the Database Manager to either start up or shut down the database before attempting the backup procedure
WGB-*-2039	No destination specified.	You must specify a destination for performing the backup. For a tape device the destination represents a non-rewindable tape device. For a directory the destination represents a directory that has read-write permissions for the user of the Web Server. Please contact your System Administrator for more information on the user of the Web Server.
WGB-*-2052	Tape destination has to be a No-Rewind device.	The device name specified for the tape device has to be non-rewindable. Please contact your System Administrator if you do not know the device name for a non-rewindable tape unit.
WGB-*-2054	Cannot start device.	The device name that you have entered for the tape device is incorrect or does not exist. Please contact your system administrator regarding the tape device.
WGB-*-2055	Insufficient space in file system for backup.	There is not enough space to perform the backup. Choose a pathname in a file system that has enough space. The maximum space needed is specified in the main screen for the Backup Manager.
WGB-*-2056	Cannot determine space in file system.	Either the file system name is incorrect or there are insufficient permissions to access this file

		system. Please check the pathname that you have specified for the backup destination.
WGB-*-2057	Could not shut down the database.	The Backup Manager could not shut down the database. If there are other users of the database, please ensure that they are disconnected from the database before attempting the backup operation again. The Session Manager can be used to disconnect sessions, or the Database Manager can be used to forcibly shut down the database.
WGB-*-2061	No tablespaces selected.	You have chosen the Backup Type to be 'Tablespaces' but have not selected a tablespace to backup. Click the left mouse button on one of the tablespaces in the list to select it.
WGB-*-2063	Another backup is in progress. Please try again later.	Another backup operation has currently locked up backup resources. Please check to see if anyone else is trying to backup the database.
WGC-*-100	Oracle Home not initialized	Possible causes are that you are connecting to the wrong database or you are trying to use the tools without logging into the database.
WGC-*-101	Oracle SID not initialized.	Possible causes are that you are connecting to the wrong database or you are trying to use the tools without logging into the database.
WGC-*-406	ORA-00406: COMPATIBLE parameter needs to be 7.2.0.0.0 or greater	Set the COMPATIBLE parameter equivalent to your database version in the **init*sid*.ora** file. You can enter this parameter in the Database Manager Edit screen, and then apply the configuration during the next startup.
WGC-*-1010	Cannot create file..	Check that the directory containing the file exists and has the appropriate permissions.
WGC-*-1011	Cannot access file.	Check that the filename and the absolute pathname to the file exist. Also check to see that the directory containing the file has the appropriate permissions.
WGC-*-1012	Cannot open file.	Check that the filename and the absolute pathname to the file exist. Also check to see that the directory

		containing the file has read permissions.
WGC-*-1013	Cannot allocate memory.	The action you performed requires sufficient memory allocation before it can proceed. Write down the identifier which occupies the position of the '*' in the Error Code and contact Oracle Worldwide Support. In the USA, call 1.415.506.1500. In Europe, call +44.1344.860160.
WGC-*-1015	Cannot write file.	Make sure you have write permission on the file.
WGC-*-1023	NLS client callback initialization failed.	Contact Oracle Worldwide Support. In the USA, call 1.415.506.1500. In Europe, call +44.1344.860160.
WGC-*-1024	NLS data loading initialization failed.	Contact Oracle Worldwide Support. In the USA, call 1.415.506.1500. In Europe, call +44.1344.860160.
WGC-*-1026	NLS message handle initialization failed.	The possible causes for this are that initialization failed, the ORACLE_HOME is not set correctly, you haven't logged in to the database which contains the message files, or you are using a browser that is not supported by the current release of this product.
WGC-*-1027	Unable to load LSF package.	Contact Oracle Worldwide Support. In the USA, call 1.415.506.1500. In Europe, call +44.1344.860160.
WGC-*-1028	Unable to initialize LSF context.	Contact Oracle Worldwide Support. In the USA, call 1.415.506.1500. In Europe, call +44.1344.860160.
WGC-*-1029	Cannot determine server method.	The web server that is not supported by the current release of this product.
WGC-*-1030	Non-integral Content length.	Contact Oracle Worldwide Support. In the USA, call 1.415.506.1500. In Europe, call +44.1344.860160.
WGC-*-1052	You have to log in before you can use the database tools.	You must log in to the database and be authenticated before you can use the tools.
WGE-*-4055	Record length out of bounds	Set the record length to a value greater than zero.
WGE-*-4056	Buffer size out of bounds	Set the record length to a value greater than zero.
WGE-*-4057	Log file creation error	Choose a valid path and filename.
WGE-*-4058	Export file creation error	Choose a valid path and filename.
WGI-*-5021	Record length out of bounds	Set the record length to a value greater than zero.
WGI-*-5022	Buffer size out of bounds	Set the record length to a value greater than zero.
WGI-*-5023	Log file creation error	Choose a valid path and filename.
WGI-*-5024	Index file creation error	Choose a valid path and filename.

WGI-*-5025	Export file not present	Specify the path and file name of a valid export file or use the Export tool to create one.
WGLA-*-1017	ORA-01017: invalid username/password; logon denied	Check your username and password and log in again.
WGS-*-7026	No Session was chosen. Select one from the list of sessions.	Select one or more radio buttons for the sessions you would like to view in greater detail.
WGX-*-406	ORA-00406: COMPATIBLE parameter needs to be 7.2.0.0.0 or greater	Set the COMPATIBLE parameter equivalent to your database version in the **init*sid*.ora** file. You can enter this parameter in the Database Manager Edit screen, and then apply the configuration during the next startup.
WGX-*-1011	Cannot access file or path <file>.	Please check the access permissions for the <file> or the absolute pathname for the <file>.
WGX-*-1013	Cannot allocate memory.	Contact Oracle Worldwide Support. In the USA, call 1.415.506.1500. In Europe, call +44.1344.860160.
WGX-*-1017	ORA-01017: invalid username/password; logon denied	Check your username and password and log in again.
WGX-*-1034	ORA-01034: ORACLE not available ORA-07429: smsgsg: shmget () failed to get segment. NCR System 3000 Error: 2: No such file or directory	If the red light is displayed, your database is down. Bring your database back up. If the green light is displayed, check the value of your ORACLE_SID.
WGX-*-1541	ORA-01541: system tablespace cannot be brought offline; shut down if necessary	Shut down the database before working on the system tablespace.
WGX-*-9025	Size parameter for datafiles must be a positive integral value.	The size value entered in the fields "Initial Size", "Increment Size" and "Maximum Size" must be a value > 0 and non-negative.
WGX-*-9026	Initial size for datafiles cannot be greater than the maximum size.	Increase the maximum size or decrease the initial size.
WGX-*-9027	The sum of the initial and increment sizes for datafiles cannot be greater than the maximum size.	Decrease the increment size or increase the maximum size.
WGX-*-9029	Insufficient space in file system to create datafile.	Please ensure that you have enough space in your file system to create the datafile or choose a different file system that has sufficient space.
WGX-*-9030	Invalid path specification. Enter the absolute pathname for <file>.	The pathname that has been entered for the data file <file> does not exist. Please re-enter the absolute pathname for the datafile <file>..
WGX-*-9031	Invalid tablespace name.	The name of the tablespace should not be blank or exceed 30 characters.
